

OFF-SEASON REPLAY QUIZ – SCORING

1. Third and Goal on B-8. QBA1 scrambles to the B-5 where he is hit and stumbles forward into B's end zone with possession of the ball. The Line Judge rules A1's knee touched the ground at the B-5. Replays show it did not.

TD A, try B-3. If the runner scores in the immediate continuing action following the ruling of down, then we can award a score in replay. This exception only applies when the goal line is involved.

2. First and 10 on B-20. Back A2 runs to the B-3 near the sideline where he is hit causing him to go airborne. He has the ball in his outside arm, and it crosses the goal line outside the pylon before he lands out of bounds. The officials rule TD. Replays show A2's left leg hitting the pylon just before he landed out of bounds.

TD A, try B-3. Replay should confirm the ruling on the field of a TD. The runner gets the goal line extended if part of his body touches the pylon before he touches out of bounds.

3. First and Goal on B-10. QBA1 scrambles out of the pocket and throws a pass from the B-12 to receiver A88 in the end zone. A88 controls the pass while airborne and is hit by B30 knocking him back into the field of play where he lands on his back and maintains control of the ball. The officials rule TD.

TD A, try B-3. Replay should confirm the ruling on the field. A88 gets the forward progress in the end zone (no different than in the field of play) if he maintains control and completes the catch.

4. On a Try from the B-3 the kick is blocked and hits the ground in the end zone where B56 attempts to recover but muffs it and A79 falls on it. The officials award Team A two points.

Try no good. Whether the ball touched the ground in the end zone is reviewable and the play is dead once it hits the ground there untouched by Team B.

5. First and 10 on A-3. Back A3 gets hit at the line of scrimmage and fumbles the ball into his own end zone where players from both teams attempt to recover. The Line Judge rules A2 down prior to losing the ball and there is no video of a clear recovery by either team.

Safety, award two points Team B. This is an exception to the clear recovery rule because it involves Team A's end zone. In this situation, the result can only be a safety or a TD so we will go with the lesser of the two. This only applies when the ball goes into A's end zone for a potential safety or TD for Team B.

6. Fourth and 18 on A-5. A1's punt is partially blocked in the end zone and the ball lands at the A-6 where B59 muffs it and the ball goes out of bounds through A's end zone. The officials rule B59 gained possession and fumbled the ball into the end zone for a touchback.

Safety, award two points Team B. Possession of a loose ball is reviewable and in this situation since B never gained possession of the ball it is still a kick. Team A is responsible for putting the ball into its own end zone and the result of the play should be a safety.

7. Third and 10 on A-40. QBA1 is hit at the A-35 and fumbles. B98 picks up the loose ball and runs toward A's goal line. At the A-5 he turns and points at A76 who was chasing him and then drops the ball as he crosses the goal line. The ball bounces through the end zone and over the end line. The Referee has a flag down for UNS on B98 and the penalty is enforced from the A-5 giving B the ball 1st and 10 at the A-20. Replays show B98 dropped the ball prior to it breaking the plane of the goal line.

A 1-10 on A-20, decline UNS B98. The result of the play is a touchback as the ball came loose prior to the goal line and it went out of bounds through the end zone in the immediate continuing action. Team A will decline the live ball UNS foul and take the result of the play.

8. First and Goal on B-2. With 12:07 remaining in the 1st quarter, back A2 takes a handoff and runs into the middle of the line and dives for the goal line. The LOS officials come in and spot the ball at the ½-yard line. A2 went into a pile and landed in the end zone, but there is no clear shot of when he was down or the ball in relation to the goal line.

A 2-Goal on B-1/2. At this point in the game although we cannot confirm the ruling on the field, we should not stop the game to review. The runner goes into a pile and it will be extremely difficult to make a definitive ruling. Late in a close game we would review.

9. Fourth and Goal on B-2. With 1:40 remaining in the 4th quarter, Team A trails 27-20 and has one timeout remaining. Back A2 takes a pitch and runs toward the goal line pylon where he is hit, and the ball comes loose. A80 attempts to recover the ball at the sideline in the end zone. The officials rule fumble and that A80 recovered the ball in bounds. Replays show A80 gain control of the ball after his left hand touched the sideline.

B 1-10 on B-20. Several aspects to review on this play. First, is whether A2 fumbled short of the goal line. If he did not, then the rest of the play doesn't matter. He did fumble so we must then look at the recovery. B will get the ball either way, but if A recovers, we have a 4th down fumble and the ball goes back to the spot of the fumble and if he doesn't it is a touchback. The difference is significant, and we must stop the game to review and change.

10. Third and Goal on B-9. With 0:50 remaining in the 2nd quarter, receiver A80 catches a pass at the B-2 and dives for the end zone. The ball breaks the plane of the goal line and the officials rule TD. Replays show A80's left elbow down with the ball at the ½-yard line.

A 4-Goal on B-1/2, 10 second runoff. The ball is short when A80 is down, so we reverse to no score. Since we are inside one minute of the half and the reversal created a running clock, we have a potential runoff. Either team can use a remaining timeout to avoid the runoff. If no TO is taken reset game clock to where it was when runner was down and run 10 from that point. Clock start on ready for play. If a timeout is taken the game clock will start on the snap.
